

OFFENSIVE PROBABILITY CHARTS

	KNIFE				SPEAR				SWORD		
	Wildly	Steadily	Slowly		Wildly	Steadily	Slowly		Wildly	Steadily	Slowly
Quick	40	32	24		80	64	48		100	96	72
Normal	20	16	12		40	32	24		60	48	36
Counter	10	8	6		20	16	12		30	24	18

	AXE				MAGIC SWORD				THRUST TO HEART		
	Wildly	Steadily	Slowly		Wildly	Steadily	Slowly		Wildly	Steadily	Slowly
Quick	100	100	96		100	100	100		28	16	12
Normal	80	64	48		100	100	84		22	10	6
Counter	40	32	24		70	56	42		19	7	3

To find the chances of hitting the ogre, first locate the chart with the weapon you are planning to use. Then find the type of attack you will use and the type of attack you expect the ogre to use. The number at the intersection of the respective row and column is the percentage of the time you can expect to hit the ogre. For example, if you use a sword and attack normal while the ogre attacks wildly you can expect to hit him 60% of the time. Note that since you are using the sword you also have a 22% chance of killing the ogre by a thrust to his heart. Only the sword or spear can kill the ogre by a thrust to his heart.

MAGIC SUMMARY CHART

Magic	When	Medium	# Uses	Lasts	Press
Lighting Bolt	Battle	Wand & Spell	One	Once	L
